WORK EXPERIENCE

PROVENTUS ANALYTICS, Richmond, Virginia

Apr 2025 - Present

ASSOCIATE SOFTWARE ENGINEER - ONSITE

- Collaborated on RentMatrix , a property management SaaS platform tailored for property managers, vendors, property owners, and tenants.
- Developed and maintained frontend modules for lease management, listings, payments, and tenant onboarding using React.js , TypeScript, and Tailwind CSS.
- Integrated Stripe for payment processing and Plaid for secure bank account verification, significantly enhancing payment flow efficiency.
- Optimized state management and component reusability with Redux Toolkit , improving scalability and performance.
- Worked closely with backend and QA teams to ensure seamless API integration and a smooth user experience across devices.
- Mentored and guided interns in learning React and Next.js , assisting them in building real-world applications.

JUNIOR FRONTEND DEVELOPER - HYBRID

- Translated design mockups into responsive, pixel-perfect UI components, ensuring visual consistency across devices and screen sizes.
- Integrated backend APIs and conducted comprehensive functional and integration testing to ensure seamless data flow and performance.
- Contributed to the development of dashboards and property listings using React.js, TypeScript, and Tailwind CSS.
- Collaborated in agile sprints, assisting senior developers in implementing reusable components and improving UI workflows.

JUNIOR FRONTEND DEVELOPER -REMOTE

- Developed the frontend for Eureka, a responsive landing page designed for a global education consultancy platform that assists students at every step of their study abroad journey – from selecting universities to navigating scholarships and visa processes.
- Designed interactive and visually engaging sections that showcase services such as university selection, scholarships, and visa assistance.
- Created ShopHub, a contemporary and responsive e-commerce platform for diverse online shopping categories.
- Implemented seamless navigation, sophisticated search and filtering options, consistent UI patterns, and an intuitive design for an enhanced user experience.

PROJECTS

Consultancy-Eureka - Frontend Developer [🔗](#)

Eureka is a trusted Institution, offering top-tier study-abroad consulting for students across Nepal.

Technologies Used: HTML5, CSS3, JavaScript, React.js, Redux Typescript, Tailwindcss
